Think of yourself as a lawyer or a sells guy & know your audience. Present a logically coherent story.
Think of yourself as a lawyer or a sells guy & know your audience. Present a logically coherent story.

Know the merit of your case. Try to highlight or avoid issues according to that.
- Think of yourself as a lawyer or a sells guy & know your audience. Present a logically coherent story.
- Know the merit of your case. Try to highlight or avoid issues according to that.
- Cite previous work very carefully and own your work.
Think of yourself as a lawyer or a sells guy & know your audience. Present a logically coherent story.

Know the merit of your case. Try to highlight or avoid issues according to that.

Cite previous work very carefully and own your work.

Don’t make harsh criticism about the previous work. Use a toned down approach.
Avoid fancy fonts.
Effective Display

- Avoid fancy fonts.
- take into account how large is the room.
Effective Display

- Avoid fancy fonts.
- Take into account how large is the room.
- Sans Serif and Arial are good choices.

- Do not write too much. People are here to listen to you.
- Avoid mathematical equations, try to use some other visualization technique. Don’t use too many graphs.
Avoid fancy fonts.

take into account how large is the room.

Sans Serif and Arial are good choices.

Do not use italics.

Never use a photocopy of a standard printed page as a display.

Do not write too much. People are here to listen to you.

Avoid mathematical equations, try to use some other visualization technique. Don’t use too many graphs.
In general following is a good arrangement.

- Describe the problem in one or two line.
In general following is a good arrangement.
- Describe the problem in one or two line.
- Provide a brief outline.
In general following is a good arrangement.

Describe the problem in one or two line.

Provide a brief outline.

Motivate the audience sufficiently.
Talk Arrangement

- In general following is a good arrangement.
- Describe the problem in one or two line.
- Provide a brief outline.
- Motivate the audience sufficiently.
- Tell them what the existing methods are doing and why we need something new.
Talk Arrangement

- In general following is a good arrangement.
- Describe the problem in one or two line.
- Provide a brief outline.
- Motivate the audience sufficiently.
- Tell them what the existing methods are doing and why we need something new.
- Describe your method.
- Try to spoonfeed them about your contribution and provide evidence through simulations and real data.
- Finally make good conclusion and give them a take home message.
Present only as much material as can reasonably fit into the time period allotted.
Present only as much material as can reasonably fit into the time period allotted.

Allot 2 minutes per slide on an average.
Timing

- Present only as much material as can reasonably fit into the time period allotted.
- Allot 2 minutes per slide on an average.
- Talk at a pace that everybody in the audience can understand. Try to hammer important concepts multiple times.

Preparing slides for oral presentation

During your entire talk and especially in Q & A, try to show yourself confident. You know your research more than anybody does.
During your entire talk and especially in Q & A, try to show yourself confident. You know your research more than anybody does.

You might encounter questions you have no clue about, don’t be nervous.
Q & A Session

- During your entire talk and especially in Q & A, try to show yourself confident. You know your research more than anybody does.
- You might encounter questions you have no clue about, don’t be nervous.
- Give extended reply to the questions whose answers you know.
During your entire talk and especially in Q & A, try to show yourself confident. You know your research more than anybody does.

You might encounter questions you have no clue about, don’t be nervous.

Give extended reply to the questions whose answers you know.

Don’t fumble even if you have no clue what you are talking about. For unclear questions, give them the impression that you have intuition about everything of the stuff you are talking about.

Give extended reply to the questions whose answers you know.

Don’t fumble even if you have no clue what you are talking about. For unclear questions, give them the impression that you have intuition about everything of the stuff you are talking about.

For clear questions either provide intuition or convince them that this is part of your future work.
Q & A Session

• During your entire talk and especially in Q & A, try to show yourself confident. You know your research more than anybody does.

• You might encounter questions you have no clue about, don’t be nervous.

• Give extended reply to the questions whose answers you know.

• Don’t fumble even if you have no clue what you are talking about. For unclear questions, give them the impression that you have intuition about everything of the stuff you are talking about.

• For clear questions either provide intuition or convince them that this is part of your future work.

• Appreciate people who are asking questions.
Thank you all for listening to me. Hope one day I can follow everything I lectured Today.
